

Overview

In January 2007, DTS Inc. combined its Cinema and Digital Images businesses to form DTS Digital Cinema, with a singular focus on supporting the motion picture industry's transition to digital cinema. Our core strength is rooted in the knowledge, experience and client relationships we've built throughout 14 years of preparing and delivering digital content into motion picture cinemas around the world. We have increasingly focused our business strategy on the creation of service and product capabilities to support the build-up and operation of an industry-wide infrastructure for digital content networks.

Expertise & Capabilities

DTS Digital Cinema is unique in its depth of experience across the entire digital cinema chain, from content preparation and delivery, through in-theatre media management, scheduling and payout. We offer a comprehensive set of products and services designed to more closely connect content creators with their audiences.

Secure Media Delivery – We offer reliable and secure movement of digital media, from our own Network Operating Centers (NOCs), through third party NOC(s), or via third party freight carriers. We have been in the business of delivering secure data all over the world for 14 years – and for over 9,000 movies – and have a proven track record in delivering both digital content and film-based media to customers, including digital surround sound, access content, subtitles, digital pre-show, e-cinema and digital cinema.

Image Processing & Workflow – We are a trusted service provider for content owners, having worked on more than 200 movies and programs, including some of the world's most valuable motion picture assets. We offer world-class image processing with the ability to edit, process, enhance, encode, encrypt and package digital content.

Integration of Media Management Systems – Leveraging our innovation and expertise in the projection booth, along with our existing competencies in hardware, software and IT systems design, we offer integrated product and service solutions for media management — from ingest to payout, from film to digital.

Business & Strategy

Our mission is to proactively serve our customers with innovative, high quality, cost effective solutions to enhance, deliver and manage digital content. DTS Digital Cinema is focused on meeting customer needs in the burgeoning digital cinema space by offering solutions that will reduce costs and increase security for distributors, while providing a broad range of revenue opportunities for exhibitors through design and supply of more efficient content management and delivery systems.

Content Services > Our Content Services group supports content owners and distributors by offering best-in-class image processing, digital content preparation and delivery services.

- Compliant JPEG2000 encoding, packaging and KDM services
- Content restoration, enhancement and repair
- Digital intermediate services scanning, confirming, processing, color correction
- DTS Digital Sound® licensing and post production services
- DTS Access™ fulfillment services for subtitles, captions, and audio description

Theatre Systems > Our Theatre Systems group are experts at guiding our customers along the path of greatest opportunity by offering bridge solutions between traditional 35mm film cinema and D-Cinema business models.

- Digital cinema playback systems
- Theatre management systems
- High-quality audio and video playback equipment
- High-definition digital pre-show and lobby advertising systems
- Software applications for booking, scheduling, and exhibition management
- Custom-designed, scalable network management services

Innovation & Leadership

We have a rich history of vision, innovation and excellence which began with pioneering Academy Award®-winning audio technology, leading the industry's first digital conversion to surround sound. With a global footprint of over 29,000 screens in over 100 countries, and a comprehensive range of image and audio products and services, we are uniquely positioned to provide a flexible set of solutions designed to assist our customers in the transition from film to digital cinema.
